

SBS PinCLEAN™

Unique Cleaning Device for Pin Tubes

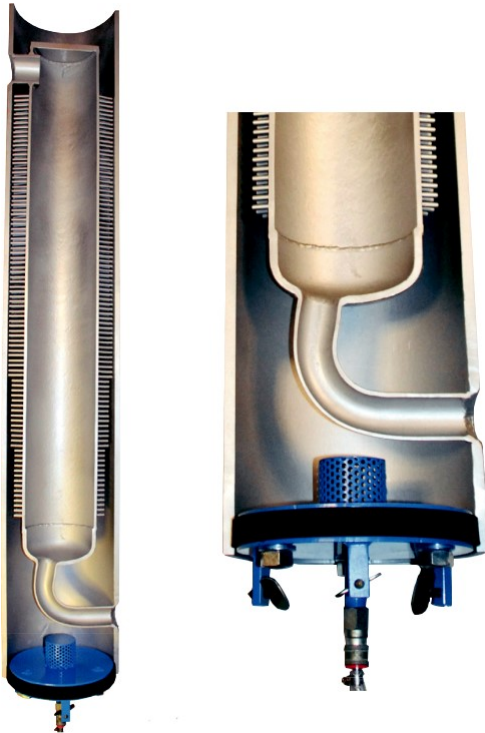

- Cleanse with the Power of Bubbles

Scandinavian Boiler Service is presenting the new **SBS PinClean™**.

The **SBS PinClean™** is the most suitable cleaning device for all oil fire boilers, composite boilers, etc. with pin tubes in the combustion chamber.

SBS PinClean™ can be installed and operated by the crew.

With a standard system, up to ten plugs can be connected simultaneously.

A thick neoprene membrane between two sealing plates is fastened at the lower end of the pin tube. Three tightened nuts squeeze the neoprene membrane in place and seal the pin tubes.

The sealing plates include filter and quick coupling for water - and air distribution.

After pin tubes are filled with water, compressed air is connected and adjusted by the air regulator for maximum cleaning effect by the fine bubbles.

Chemicals can be added if necessary.

The rest of the job is done by the bubbles – not with brute force but with constant wear.
